

MATHEUS BEIRUTH

Full-Stack Developer | Python, React Native, TypeScript, Java

Maricá, RJ | (21) 98521-7283 | matheusbeiruth10@gmail.com | github.com/BeiruthDEV | linkedin.com/in/matheusbeiruth

PROFESSIONAL SUMMARY

Full-Stack Developer (React Native & Python) with hands-on experience building production mobile applications and backend systems. Currently developing Liga Level Up, a community platform consolidating events, benefits, gamification, and virtual gaming tables. Strong foundation in React Native, TypeScript, Supabase, and modern architecture patterns. Student of Software Engineering (8th semester) seeking Junior or Internship position.

CORE SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

Frontend & Mobile: React Native, React, Next.js, React Navigation, Expo, Tailwind CSS

Backend: FastAPI, Django, Flask, REST APIs, JWT Authentication

Database & Tools: Supabase (PostgreSQL), MySQL, MongoDB, Axios, Git, GitHub

Architecture: SOLID principles, Layered Architecture, State Management (Context API/Redux), Component Design Patterns

PROFESSIONAL EXPERIENCE

Full-Stack Developer (React Native) | Community Digital Platform, Maricá, RJ Jan 2025 – Jul 2025

- Developed complete React Native application with 7+ modules (authentication, profiles, events, rankings, subscription plans, community feed, virtual gaming tables) for centralized community platform.
- Implemented role-based authentication (free/premium/admin) with Supabase, managing permissions across multiple modules and user types.
- Built sophisticated UI components: paginated event listings, dynamic plan comparisons, real-time chat, ranking system with avatars.
- Worked in lean team of 2 full-stack developers with autonomy for architectural decisions and end-to-end feature implementation; applied SOLID principles and component reusability patterns.

Commercial and Operational Assistant | Onshop.dmo, Maricá, RJ Aug 2024 – Jan 2025

- Managed 200+ SKU inventory for e-commerce platform, maintaining 99%+ accuracy and improving operational efficiency.
- Processed customer orders and resolved post-sale issues with <24hr average response time; standardized operational processes reducing recurring errors.

FEATURED PROJECTS

Gestão Ativa - *Next.js, React, TypeScript, FastAPI, Pandas, pdfplumber*

Financial intelligence SaaS: users upload bank statements → app auto-categorizes transactions, detects recurring expenses, and generates financial diagnostics. Eliminates manual spreadsheet analysis.

github.com/BeiruthDEV/gestao-ativa-demo

Loveline - *Next.js, TypeScript, Supabase, Tailwind CSS*

Shared timeline platform for couples: record moments, travels, milestones, conflicts, and daily life; stores relational data with authentication and role-based access.

github.com/BeiruthDEV/lovelilne-demo

Enterprise Flow - *Django 5.2, Python, Bootstrap, Chart.js*

Corporate platform for company management: dashboards, project tracking, operational reports with role-based permissions and interactive analytics.

github.com/BeiruthDEV/enterprise-flow

EDUCATION

Bachelor of Science in Software Engineering 2022 – 2026 (8th semester)

Universidade de Vassouras, RJ

CERTIFICATIONS & TRAINING

- Digital Future Grant (Softex) — Back-End Python / *6 months*
- MySQL Comprehensive Course — Curso em Vídeo / *40 hours*
- Data Structures & Algorithms — Augusto Galego
